## SUMMARY

---

Community-driven professional committed to adding value. Motivated to develop innovative web applications. Seeking to advance skills with patient determination and resilient perseverance. Well versed in web development and database programming languages. Recently collaborated with a team to build an application that allows users to create and submit rock climbing routes that could then be rated and reviewed by other users. I look forward to applying my keen analytical and problem-solving skills, curiosity, and zeal for web development to your team.

---

## TECHNICAL SKILLS

**Languages:** JavaScript, SQL

**Data Manipulation and Visuals:** Sequelize, HTML/CSS, Bootstrap, Materialize

**Other:** Node.js, Express.js, API, Handlebars.js

---

## PROJECTS

### Rock Climbing App | Developer

- Collaborated with a small team to develop a responsive application where users can create and submit rock climbing routes that could then be rated and reviewed by other users
- Focused on creating an intuitive and user-friendly interface that interacts with a robust back-end, utilizing RESTful architecture
- Technologies Used: Node.js and Express, Sequelize, Handlebars.js, Materialize

### Cryptocurrency Dashboard | Developer

- Collaborated with a small team to develop a versatile dashboard that displays an integrated candlestick graph and current news reports based on user input
  - Created an intuitive application that displays current and historical price data fetched from a server-side API to a dynamic graph while focusing on agile software development principles
  - Technologies Used: JavaScript, HTML/CSS, Bootstrap, API
-
